

RANGE

Indoor recessed flood light with remote control gear for use with 70W or 150W HQI lamps.

APPLICATIONS

Particularly suitable for small areas i.e. shops, windows, corridors, walkways, restaurants, hotels, museums, entrance halls and show rooms.

CONSTRUCTION

Body is made of heavy gauge zinc treated sheet of steel finished in electrostatically applied white or black polyester powder paint. The reflector is manufactured with high purity anodized aluminium. The front protection lens is made of toughened glass, and as optional for 150 W HQI lamp a special UV filter glass can be provided .

ELECTRICAL

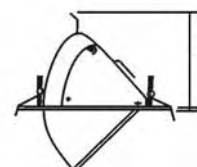

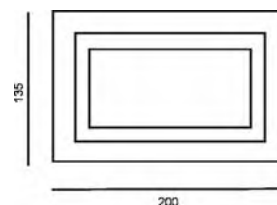

The fitting is supplied with a three pole terminal block. High temperature silicon insulated conductors are used throughout.

OPTIONAL

Special UV filter glass to be used with 150 W HQI lamps.

SPECIFICATION

Designed in accordance with the following Standards: CEI 34-21 and EN60598-1
