

GARDEN®

RESIDENTIAL LUMINAIRE

LAMP COMPARTMENT
IP 65

RANGE

A compact outdoor fitting which uses PAR 38 lamp.

APPLICATIONS

Can be used to light gardens, walls, and statues. Garden® can be installed on the wall (spot) with 2 screws or directly into the garden (via spike).

CONSTRUCTION

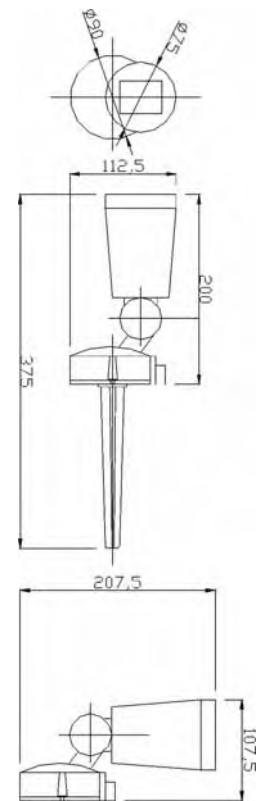

The Garden® fitting is made of fiber glass reinforced Nylon. The silicon rubber gasket used at the entrance of the lamp and around the terminal box guarantee IP 65 ingress protection. The E27 lampholder is made of porcelain and is connected with the terminal block.

ELECTRICAL

A two pole terminal block is already installed in the terminal box. High temperature silicon insulated conductors are used throughout.

SPECIFICATION

Designed in accordance with the following Standards: CEI 34-21 and EN60598-1.
